

We are an idea-driven, value-based environmental company offering green consulting to the public and private sectors. We provide clients with concepts, strategies and plans of action for landscape-scale conservation of natural resources, climate adaptation, energy planning and "net zero" strategies, water security, smart growth and transportation, and the management of issues relating to encroachment pressures on government and private lands, open space and habitat. Our thinkers, planners and strategists skillfully combine strong analytical techniques with stakeholder outreach and engagement, to devise solutions to seemingly intractable issues for our clients at the federal, state and local levels and in the private sector.

Land Conservation and Restoration:

- ✓ Conservation Conveyance
- ✓ Net Environmental Benefits Assessment
- ✓ Encroachment Controls and Compatible Land Use
- ✓ National Environmental Policy Act

Climate Adaptation & Water Resources:

- ✓ Climate Adaptation
- ✓ Conflict Resolution
