

Greenup Industries specializes in delivering first-rate maintenance services to the refinery and industrial companies in the Gulf South. Lead by experts in the field, we offer unparalleled expertise in training and staffing services in the oil and gas industry throughout Louisiana, Texas, Mississippi and Alabama.

Greenup Industries is one of few minority-owned businesses (disadvantaged business entities) in the oil and gas industry. We carry our DBE certification with integrity by providing unparalleled results for clients facing challenges and risks and those looking to avoid them.

Our clients' needs are met through top tier contracting and outstanding communication with our team of expert leaders in the oil and gas industry. The company has provided professional services, specialized services, and procurement support for more than 25 years to a diverse clientele, including private entities and the federal government.

Contact Greenup Industries for all your onboarding, maintenance, and staffing needs.

HISTORY

Greenup Industries was incorporated in 2012 in response to an expressed demand in the downstream petrochemical market in Louisiana, Texas, Mississippi and Alabama. We exist to fulfill a need in the oil and gas industry to consolidate one-off vendors and ensure consistency across various sites for large groups of contractors. As a specialty maintenance service provider and third-party procurement specialist, it is important to us that all sub-contractors understand and follow established guidelines for safety quality and schedule. Greenup Industries provide peace of mind by managing hundreds of vendors in the same consistent manner across the Gulf Coast ensuring safe on boarding, quality control and oversight, assumption of liability and indemnity, and specialty maintenance services.
