

TekSynap (formerly Synaptex Corporation) understands both the pace of technology today and the need to have a comprehensive well planned information management environment.

**Technology moving at the speed of thought**<sup>®</sup> embodies these principles – the need to nimbly utilize the best that information technology offers to meet the business needs of our Federal Government customers.

The TekSynap founders have worked together for over a decade, supporting customers ranging from small departmental operations & maintenance efforts to leading broad nationwide deployment efforts for agencies such as the U.S. Department of Veterans Affairs. This core management team has operated in leading companies such as SIGNAL Corporation and managed business sectors of over 100M in annual revenue in industry leading companies such as General Dynamics.

At each level this team has absorbed what “works” – for the company, our customers and our employees. We synthesize the best at each level resulting in a unique service provider that combines the infrastructure and process models of larger organizations with an agile ability to cost effectively meet our customer’s requirements.
