Everywhereyoulook™

TECHNOLOGY SOLUTIONS

Beginning as a small collection of unique marine solution providers and expanding to a powerhouse of highly engineered, high performance solutions for a broad range of markets, Teledyne Marine now offers the largest breadth of marine technology in the industry.

With technologies divided into 5 core segments; Imaging, Instruments, Interconnect, Seismic and Vehicles, Teledyne Marine can address brand level solutions, turn-key and customized systems that leverage our full range of technology. Our goal is to provide one-stop purchasing capability, world-wide customer support, and the technical expertise to solve the toughest ocean-related challenges.

The Teledyne Marine Vehicles group manufactures and supports a wide range of unmanned vehicles for operations from the surface to the seafloor. Teledyne is a supplier for fully equipped surface, shallow-, mid- and deep-water unmanned vehicles and towed systems addressing various applications for oceanographic research, offshore oil and gas, and defense and security. The Vehicles group includes Benthos, Gavia, Oceanscience, SeaBotix and Webb Research.
